Hereditary Spell

Plague

CV	*Type*	*Duration*
15+	Range 18"	Instant

Effect

May be cast on enemies in close combat. Each model in the targeted unit must pass a T test or suffer one Wound which Ignores Armour saves. If cast on a unit engaged in close combat, all units involved in the fight (friend and foe) will be affected. After working out the effects of the spell and removing casualties, roll a dice on the Plague Chart and continue to apply the results until the spell ends or there are no targets within range.

Trace a straight line from the base of the caster the number of inches rolled. All models in its path must pass an I test or be removed as casualties with no saves except Magic Resistance allowed. Instead of taking an I test, War Machines and Chariots must instead roll a 5+ or be destroyed. A building (or single section of a multi-part building) affected by the spell will collapse on a roll of 5+. If the building collapses, any models garrisoning it must pass an I test, or be removed as a casualty with no armour save allowed. Any survivors are placed outside the building, as described for a unit abandoning a building. Then replace the building with an area of dangerous terrain of equal size. Boosted version doubles the result of the 4D6" range rolled.

Can affect Infantry units. The unit suffers 3D6 Hits, though no single model can be Hit more than once. Each model Hit is automatically slain with only
Magic Resistance being allowed as saves. If the whole unit is removed as casualties, replace them with a number of Clanrats equal to the number of casualties, with any normally allowed equipment or command, facing the same direction as before. The casting player now controls this unit. If the casting player does not have enough models to replace the entire unit, transfigure what you can, the rest are considered destroyed. If the number rolled is not great enough to replace the whole targeted unit, then remove as many casualties as the number rolled.
